

SCHOOL ZONE SAFETY SYSTEM

Introducing Radarsign's Child Safety Package

Make Your School Zone Safer With Radarsign's Child Safety Package

Our Child Safety Package (CSP) includes flashing beacons, a regulatory speed limit sign, and a Radarsign[™] driver feedback sign with a yellow fluorescent YOUR SPEED faceplate. Equipped with an integrated timer system, the CSP can be programmed to operate only during specified school days and school hours and to adjust for different speed limits during school zone times.

The CSP is more effective than stand-alone flashing beacons because of the physiological response of drivers to the radar sign displaying their actual speed. Because the sign flashes the driver's speed as they approach the sign, the driver is forced into an active state of awareness of how fast they are driving, resulting in increased speed limit compliance.

Each component in the CSP was designed to meet the highest quality standards, withstand the toughest weather, and provide a reliable method of slowing traffic in school zones and keeping our children safer.

Key Features & Benefits Of Child Safety Package

- Data collection feature allow safety personnel to measure success in slowing traffic, and provides specifics to intelligently deploy law enforcement, which results in increased safety.
- Entire system works from single power source on a single pole, reducing costs
- Industry leading energy efficient radar sign design means a smaller solar panel & battery backup and lower cost.
- Integrated design allows the timer/calendar to control both beacons and radarsign
- Yellow fluorescent school zone color YOUR SPEED faceplate for maximum visibility
- The most vandal-resistant driver feedback sign design on the market today
- Solar models carry 14 days of backup battery operation, ensuring continuous operation
- CSP arrives 90% assembled, for easy and quick installation
- Available in AC or Solar models with polycarbonate or aluminum housings for beacons
- All Radarsign driver feedback signs collect traffic statistics which, when used with our optional StreetSmart software, allows owners to quantify the effectiveness of the sign.
