## **Radarsign™ Announces Banner Sales Year in Traffic Calming Solutions**

### Company Sees 33 Percent Increase in Revenues Over Previous Year with Compound Growth Rate Over Seventy Percent

**Alpharetta, GA, October 2009**—Despite the current recession, Radarsign, LLC, the premier provider of traffic calming solutions, today announced the company has seen record sales in 2009, with a 33 percent increase in total revenues over the previous year and a five-year compound growth rate of over 70 percent.

*"January of this year was originally our best month to-date, and now, July, August and September business has surpassed that success," explained Charlie Robeson, co-founder of Radarsign. "2009 has proven to be our best sales year, and we still have three more months to continue the trend."*

Radarsign produces, markets and distributes easy-to-operate driver feedback signs for neighborhoods, school zones, work zones, parks, daycare areas, churches, or anywhere road safety is a concern.

Robeson attributes the company's success to community officials' continued dedication to neighborhood safety and the effectiveness of Radarsign's product line. *"Speeding is an issue for all communities, everywhere. Our driver feedback signs are proven to slow speeders, making roads safer for everyone. In fact, around 20 percent of all our sales are repeat business, which is a testament to customer satisfaction and how well our products work."*

Some recent examples of Radarsign's success include [Stone Mountain Park](#), where seventy percent of all drivers were speeding in the 3200 acre park; Radarsign driver feedback signs brought that total number down to twenty-three percent. In a [Dunwoody school zone](#), Radarsign reduced the total number of speeders by 50 percent.

**About Radarsign:** In 2004, Atlanta-based Radarsign™ established new industry standards for traffic-calming solutions with the debut of the world's only armored driver feedback signs, which are vandal, weather and bullet-resistant. The industry's most durable radar signs are also the most ecological. Radarsign's MUTCD-compliant products—the industry's most energy-efficient—are made in the USA and utilize recycled aluminum, innovative LED refractor technology, minimal battery power and solar panels to deliver bright, easy-to-read feedback to drivers. Radarsign has been entrusted to provide safe and effective traffic-calming solutions for: municipalities, treasured national parks, children and families at schools and in neighborhoods, military bases that protect homeland security, and private and public development projects across the U.S., Canada and overseas.
