Largest Healthcare System in the U.S. is Calming Speeding Drivers with Radarsign™

Alpharetta, Ga., December 27 2010—The VA healthcare system—[the largest in the US](#), serving some [9.4 million](#) people each year—is helping ensure the safety of patients, visitors and employees by installing radar driver feedback signs from Radarsign™ at seven locations.

Ensuring campus-wide safety for any medical facility requires a comprehensive traffic-calming plan that is considerate of the needs of pedestrians, drivers and, importantly, the mission-critical transportation requirements associated with ambulances and other rescue vehicles. [Studies have proven](#) that vertical traffic-calming measures—such as speed humps and speed tables—interfere with response times of emergency vehicles, with each speed hump costing ten seconds in response time. For elderly patients and those recovering from injury or surgery, traveling over humps can quite painful.

The VA healthcare system is one of a growing list of hospitals—that includes Forsyth Medical Center (NC), St. Anthony's Hospital (CO), and Phoebe Putney Hospital (GA) as just three examples—that have made Radarsign the provider of choice.

Radarsign—the manufacturer of the world's first armored driver feedback sign—produces traffic-calming products that are rugged, effective and, *importantly*, cost efficient. Low start-up costs with no scheduled maintenance expenses are especially attractive features for any traffic-calming need.

About Radarsign

In 2004, Atlanta-based Radarsign™ established new industry standards for traffic-calming solutions with the debut of the world's first **armored driver feedback signs, which are vandal, weather and bullet-resistant**. The industry's most durable radar signs are also the most ecological. Radarsign's MUTCD-compliant products—the industry's most energy-efficient—are made in the USA and utilize recycled aluminum, innovative LED refractor technology, minimal battery power and solar panels to deliver bright, easy-to-read feedback to drivers. Radarsign has been entrusted to provide safe and effective traffic-calming solutions for: municipalities, treasured national parks, children and families at schools and in neighborhoods, military bases that protect homeland security, and private and public development projects across the U.S., Canada and overseas. www.Radarsign.com.
