

What our Law Enforcement customers are saying about us....

"We looked for alternatives to our old speed trailer, we liked the Radarsign TC-400 because it could fit in the back seat of the patrol car and be relocated so easily...The signs definitely slow down the speeders. They 100% work." - Sgt. Kyle Girard – Town of Rotterdam Police Dept.- Rotterdam (NY), January 2017

"We had speed trailers, but they are a pain to set up and take down. The TC-400s are smaller and do the same thing, but they are easier to set up. We

use the dual battery system and swap them out every 5-7 days."

- Capt. Larry Fischbach, City of Avon Police Dept. – Avon (OH), June 2017

"I am very pleased with compactness, weight, and battery life of the TC-400 and its overall capabilities. They are most definitely effective in slowing traffic....The traffic data is very useful, especially when there are exaggerated claims of excessive speeding, like 55 in 25 mph zone."

- Sgt. Thomas R Murray III, Traffic Safety Bureau – City of Princeton- Princeton (NJ), March 2017

"The data from the signs helped us identify one area that we thought had a speeding problem. But we learned it was much worse than we thought. People are ecstatic about the sign. It does slow traffic. The sign helps in two ways. It slows drivers who are speeding and it informs residents who think cars are speeding that they often are not."

- Chief Bob Longo, City of Milton Police – Milton (DE), September 2017
