

What our School Customers are saying about us.....

"When I started comparing Radarsign to other signs, I found that Radarsign had everything that I liked. I knew I could stop my search."

"We added some speed bumps, but some drivers treated them like launching pads. When we installed the feedback signs, they slowed the cars "

- Bob Wiese, University of Kansas Medical Center – Wichita (KS), June 2016

"We put up several Radarsign driver feedback signs and there's no question they've made a difference. The signs are hard to miss and they slow drivers down."

"We installed a Radarsign driver feedback sign in a school zone and I definitely feel our roads are safer because of them."

Ricky Williams, City Clerk, City of Muscle Shoals – Muscle Shoals (AL), September 2015

"The Radarsign driver feedback signs really help. We've put them in school zones and when people drive through, everyone sees their speed and it slows drivers down."

Terry Hagen, Public Works Director/City Engineer, City of El Centro – El Centro (CA), September 2015

"During pick-up and drop-off times, 20% of the cars were speeding with some going as fast as 35 mph. After installing Radarsign's driver feedback sign, only 8.5% are speeding, a 57% reduction!"

Ron Lattanze, Parent/Traffic Committee, The Raleigh School – Raleigh (NC), June 2014
