

What our Business/Corporate Customers are saying about us.....

“Our safety program is very employee oriented. Employees fill out O&Fs (observation & feedback). Speed was one of their concerns. The driver feedback sign from Radarsign enabled us to address the issue.”

- Buster Cole, Chief Safety Officer -Phifer, Inc.-
Tuscaloosa (AL), December 2016

“We recently reduced the speed limit on our railroad tracks to 10 mph. We were looking for options to keep the locomotives within the speed limit. This has helped them reduce their speed and things are running pretty smooth now.”

- Tim Chatman, Nucor-Yamato Steel – Blytheville
(AR), March 2016

“Radarsign was chosen because it was the complete package, easy to assemble and the price coincided with our budget. We found Radarsign, weighed the pros and cons of their radar speed signs vs other signs and purchased the Radarsign brand.”

Natalie Britton, Project Administrator,
NRG Engineering – Thompsons (TX), August 2015

“Prior to installing the signs, trucks were speeding and rolling over. Since we installed the Radarsign speed sign, we haven’t had any rolled trucks!”

- Ian Drazin, Clearwater Paper Company, March
2013
