

What our Municipal/County customers are saying about us.....

"We are very pleased with our signs. We use them in school zones and downtown. We pull data on occasion, doing before-and -after analysis. The results show a significant drop in speed. The Radarsign signs require minimal maintenance without any headache. We put them out and let them do their job."

- Mark Nichols, Traffic Engineer – City of Jonesboro (AR), July 2018

"We used to have a speed trailer but it didn't track data. We like the portability of the TC-400 and the data that it provides. It is effective in assuring residents that their speeding concerns are being addressed."

- Mark Bushnell, City Engineer – City of Sycamore – Sycamore (IL), January 2018

"I am very pleased with the performance of the radar sign. It has helped considerably with the speed control on one of our busiest streets, and I also like the ability to download traffic data off the device."

- Brett Mehmen, Public Works Director – City of Tiffin -Tiffin (IA), March 2018

"We used to borrow radar speed trailer from the county sheriff but whenever we asked for it, it was always being used.

A nearby community had the TC-400, we liked how it could be moved around. We bought multiple brackets so we could easily install it in different locations. It's a great product."

- Tony Green , Police Chief – City of Elroy- Elroy (WI), January 2018
