

EZ Comm Cellular Remote Cloud Management System

EZ Comm is a secure, cellular modem, remote cloud management system. It provides the central management of your radar speed signs from a single browser-based user interface.

- **Centrally Managed:**
Control one to thousands of system from any browser-based user interface.
- **Fast and Secure:**
Utilizing cloud-based architecture, EZ Comm provides secure and reliable communication between the system server and network controller.
- **Remote Access via Cellular Modem:**
Daily automated communication with radar speed sign or beacon system for updates and downloads. Ability to send instant change requests as needed.
- **Convenient:**
Authorized users have instant access to the network anytime from anywhere, using a browser-enabled desktop, notebook, tablet or smartphone.
- **Automated Data Collection:**
Every night, the EZ Comm system will upload traffic data to our cloud based host. The information can be downloaded to a PC or laptop for use with our Excel-based Streetsmart traffic data reporting program (separate license). Historical data is retained by our host system for a full 12 months for each radar speed sign. Raw individual vehicle records are also available for customizing your own reports.
- **Cost/Resource Effective:**
Eliminates the need for resources to be deployed to the field to manage individual signs, saving time, fuel, and re-training costs.
- **Easy Scheduling:**
A full year schedule can be pre-programmed in advance; multiple devices can share the same schedule.
- **Accurate:**
GPS receiver in the network controller obtains its calendar time base from ultra-accurate atomic clocks, ensuring on-time system activation and allowing the entire system enterprise to be seen from a GPS map.
- **System Alerts:**
Provides daily diagnosis of device health, battery levels, and notifies system if power drops too low or device fails to communicate with the host
- **Peace of mind:** 2 year warranty on the cellular modem, radar speed signs, and flashing beacons.

Available for use with the TC-600 and TC-1000 models

SIGN MANAGER:

GPS map of sign locations, groups of signs, and the ability to review and edit schedules from a single screen

Sign	Type	Location	Group	Status	Serial	Client		
#08 - 101566	Radar	8200 Roberts Dr (Southbound)	Davis Academy	enabled	101566	City of Sandy Springs	Schedule	Edit
#09 - 101567	Radar	7995 Roberts Dr (Northbound)	Davis Academy	enabled	101567	City of Sandy Springs	Schedule	Edit
#10 - 101575	Radar	Spalding Dr Eastbound, Hunters Branch Dr	Woodland Charter ES	enabled	101575	City of Sandy Springs	Schedule	Edit
